TheseDays is Spotify, but for your memory.

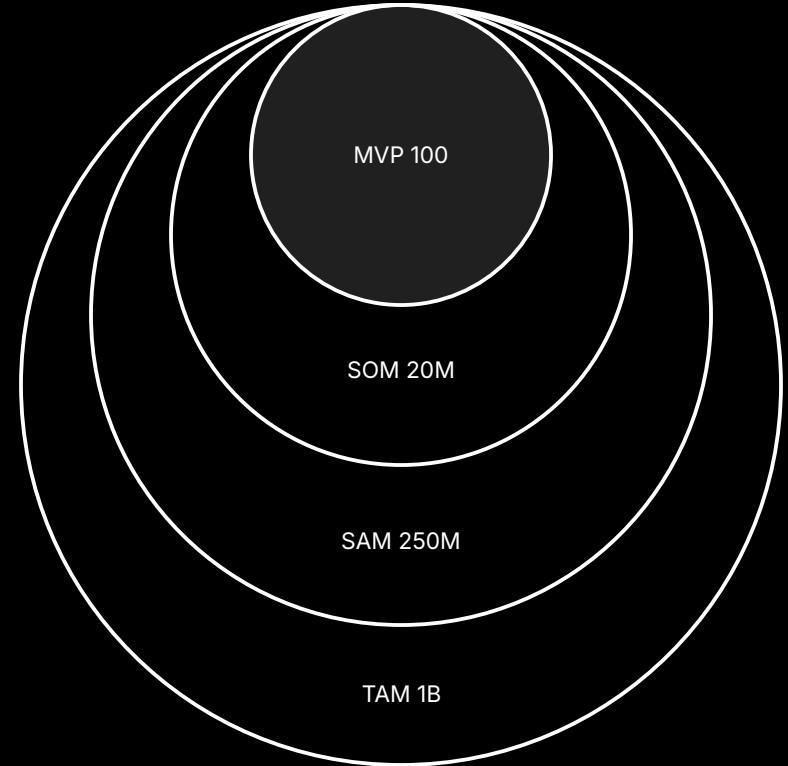

TheseDays will be a new architecture that
bridges love and self actualization .

Market

TheseDays addresses a large and growing market of digital-native users who already document their lives extensively, with a focused entry into high-frequency documenters where the need for structure and meaning is most immediate.

Gen Z, digital-native users who already document their lives heavily with large personal archives but very little structure.

Free to capture,
Paid to unlock AI enhanced life chapters.

Naomi Toubian

Problem: The old lifestyle ...

To Do:

- Study for physics with Ryan
- Make pitch deck at Strada
- Do math homework
- Take Brandon on a coffee chat
- Submit physics midterm 1 regrade ✓
- Answer emails
- Study for physics and find tutor
- NH Spring break assignment
- Figure out summer something (internship, shadowing, something - shadowing pediatric neurology, volunteering at cedar sinai, volunteering in Switzerland or London or Paris)
- MDA - https://ie.my.salesforce-sites.com/REG_SelectExperience?exptype=MDA&lang=en, look at emails
- Fall semester classes
- Find Cogsci first reader
- Do Soc 1 interviews, adapt the horrendously beautiful life interview scripts to make adaptation that adds things that now additionally work for social project
- Get more interviews for documentary
- apply for science lab - pediatric hospital Oakland, UCSF children's hospital,
- reschedule doctors apt
- KALX
- Apple Store
- Vivian's birthday present
- Annual Shenassa Toubian #foundation brunch
- Become a CNA & ENT
- Make #foundation insta post
- Classes /schedule -> go through all syllabi and add dates to calendar etc
- Meetings for med reqs etc
 - Repair event registrations
 - School event prep and set up
 - Berk ambassador app -> find diff option
 - Do pre move in stuff for the standard

Current scheduling systems optimize for time, not cognition

- Ignore energy, stress, and behavior
 - Fragmented systems
 - Chronic cognitive overload

Despite hundreds of productivity tools...

80-95% of students procrastinate

67% of U.S. adults experience burnout

75-85% of U.S. adults experience stress

Assignments
create stress for
83% of students

TradePath

Chris Weiss

TRADEPATH / PITCH

EST. 2026 — A POST-COLLEGE GENERATION

TradePath.

Find your trade. Build your life.

The neuroscience-backed discovery brand for the post-college generation.

FIND YOUR
TRADE

01 THE PROBLEM

A generation is rethinking college.

AI is automating the jobs they were trained for. The trades are booming. Nobody is helping them figure out where they fit.

10x

increase in trade-school applications at MikeRoweWORKS in the past year

44%

of Gen Z are now attending or considering trade schools

\$280K

what some 20-somethings earn as data center electricians

Sources: Mike Rowe / Fortune (2026), Resume Builder (2025), BLS (2025)

02 THE GUIDANCE GAP

They want in. Nobody is showing them where to go.

WHAT EXISTS TODAY

01 / Marketing quizzes from trade schools are biased, outdated.

02 / 1950s personality tests dressed as career tools.

03 / Mike Rowe's voice is inspiring, but no product underneath.

04 / Parents and counselors still defaulting to college.

ZERO

research-validated tools that match a person to a trade based on how their brain actually works.

03 THE SOLUTION

The TradePath Assessment.

A 20-minute neuroscience-backed assessment that maps how your brain works to the trades you'd thrive in.

01

SPATIAL

Mental rotation, 3D visualization.
Predictive of fit for HVAC, electrical, framing.

02

ATTENTION

Sustained vs. switching profiles. Routes troubleshooters away from task-switchers.

03

COORDINATION

Fine vs. gross motor proxies. Welding, plumbing, finish carpentry differ here.

04

TEMPERAMENT

Conscientiousness, risk tolerance — most predictive of long-term tenure.

→ Co-developed with Dr. Sahar Yousef, cognitive neuroscientist at UC Berkeley.

04 BUSINESS MODEL

Free for users. Schools pay.

The assessment routes neuroscience-matched leads to schools and programs.

PER LEAD

\$300+

Schools currently pay this for unqualified leads.
Ours are screened.

PER ENROLLMENT

\$1,500

Premium pricing for high-conversion,
neuroscience-matched students.

PER PLACEMENT

\$2,500

Year 2+: contractors and employers pay for
matched workers.

\$10B+

trade school + apprenticeship lead-gen TAM

~85%

gross margin on digital leads

29K+

trade schools and programs in the U.S.

05 GO-TO-MARKET

Build the brand. Run the assessment. Route the demand.

01 CONTENT

Founder-fronted brand on TikTok, YouTube, Instagram. Real wages, real lives, the trades-vs-college question.

02 ASSESSMENT

Free 20-min neuroscience-backed quiz. Output: top 3 trades that fit, with the cognitive rationale.

03 ROUTING

Personalized recommendations to schools, apprenticeships, and pre-app programs in their area.

→ Validated direct: Lincoln Tech leadership and 2 community college CTE programs. Real demand.

06 THE BIGGER PLAY

AI is breaking the college-to-job pipeline.

Millions of young Americans need a new path. We supply the weapons.

COLLEGE PATH

Breaking down.

Entry-level white-collar work is being automated.
Hiring is collapsing.

TRADEPATH

TRADES PATH

Booming.

Rising wages. AI-resistant work. 41% of workforce retiring by 2031.

HOW WE BECOME THE ON-RAMP

ASSESSMENT

Year 1. Free, neuroscience-backed quiz. Tops the funnel.

BRAND

Year 1-2. Founder-fronted brand reaching millions.

ROUTING

Year 2. Schools and programs pay for matched leads.

PLACEMENT

Year 3. Direct employer partnerships. Trade school 2.0.

07 WHO WE ARE

Built by the people who can build it.

FOUNDER

Chris Weiss

Cal, Cognitive science. Rower. Son of blue collar parent who showed him what hard work looks like. Building TradePath because his peers are getting degrees for jobs that won't exist.

SCIENTIFIC ADVISOR

Dr. Sahar Yousef

Cognitive neuroscientist, UC Berkeley Haas. Co-developing the assessment. Her research on attention and cognitive performance is the foundation.

STRATEGIC ADVISOR

Christopher Kelly

Former Booz Allen Hamilton. Decades of consulting and infrastructure expertise guiding company strategy and operations.

08 THE ASK

Help us build the on-ramp *for the next generation.*

RESEARCH

Validation partners — programs willing to pilot the assessment with their cohorts.

DESIGN

5-10 trade schools as design partners for the routing engine.

CAPITAL

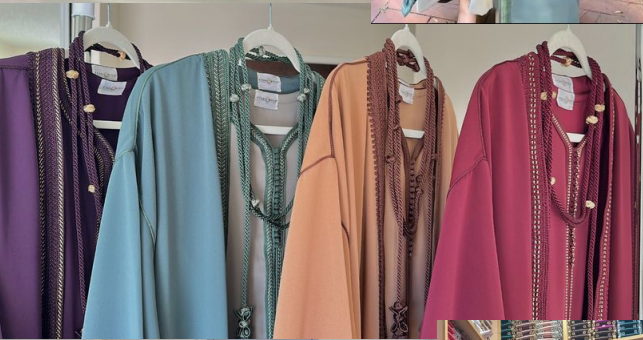

Seed runway to build the assessment, the brand, and the founding team.

MAX SIZE: 50MB

AUTHENTICATION STATUS

ANALYZING THREAD PATTERN

Cross-referencing warp and weft tension with historical archives...

VERIFYING DYE ORIGIN

Awaiting spectral analysis data.

FINAL CERTIFICATION

Pending completion of prior steps.

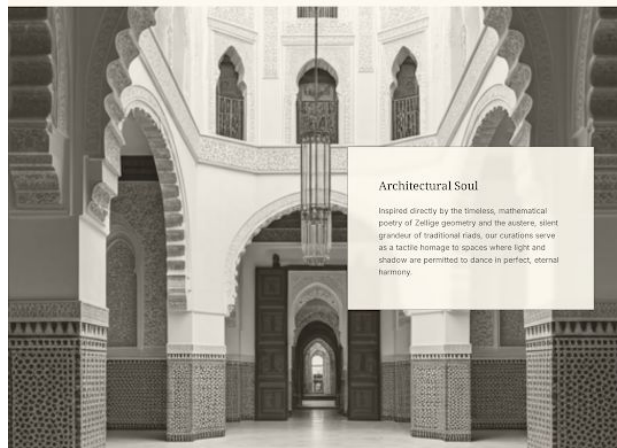

HERITAGE REIMAGINED

Preserving the silent legacy of the Maghrib.

Beyond the fleeting trends of the modern era lies a quiet, enduring resilience. We are custodians of a heritage woven deeply into the ancient looms of the Atlas Mountains, shaped meticulously by hands that have inherited centuries of silent mastery and unspoken devotion to craft.

The true soul of our collections does not reside in mechanical precision, but in the calloused palms of our artisans. Every raw thread selected tells a story of profound patience; every knot tied is a solemn testament to an unbroken lineage of exquisite craftsmanship.

Architectural Soul

Inspired directly by the timeless, mathematical poetry of Zellige geometry and the austere, silent grandeur of traditional riads, our creations serve as a tactile homage to spaces where light and shadow are permitted to dance in perfect, eternal harmony.
